GENERAL DISCLAIMER

The information posted on the state board of medical examiner's website was provided by applicants for an original medical license; applicants for reinstatement or reactivation of an existing medical license; as well as by those physicians renewing a medical license. This information is not verified by the board. The board will take action to obtain compliance with the requirements to provide accurate and timely information as required by law when information is received that indicates information required by law has not been received or is not accurate.

AVAILABILITY DISCLAIMER

Physicians who have an inactive or lapsed license are not required to complete a physician profile until they apply for reactivation or reinstatement. Also, physicians who hold a physician training, foreign teaching physician or Shriners Hospital license are not required to complete a profile. To verify whether there have been any board actions against this physician click [here](#) to go to the Automated Licensure Information System (ALISON).

MALPRACTICE CLAIMS DISCLAIMER

Some studies have shown that there is no significant correlation between malpractice history and a doctor's competence. At the same time, consumers should have access to malpractice information. To make the best health care decisions, you should view this information in perspective. You could miss an opportunity for high quality care by selecting a doctor based solely on malpractice history. When considering malpractice data, please keep in mind: (1) Malpractice histories tend to vary by specialty. Some specialties are more likely than others to be the subject of litigation. (2) You should take into account how long the doctor has been in practice when considering malpractice averages. (3) The incident causing the malpractice claim may have happened years before a payment is finally

made. Sometimes, it takes a long time for a malpractice lawsuit to move through the legal system. (4) Some doctors work primarily with high-risk patients. These doctors may have malpractice histories that are higher than average because they specialize in cases or patients who are at very high risk for problems. (5) Settlement of a claim may occur for a variety of reasons that do not necessarily reflect negatively on the professional competence or conduct of the physician. A payment in settlement of a medical malpractice action or claim should not be construed as creating a presumption that medical malpractice has occurred. You may wish to discuss information provided, and malpractice generally, with your doctor.
